

General Terms and Conditions - Contract for the Software Transfer of Standard Software **("GTC-ST")**

the
OMNINET Nederland
President Kennedylaan 19
2517 JK Den Haag
Netherlands

hereafter referred to as "**OMNINET**".

(Status: 10.01.2024)

§ 1	SCOPE OF APPLICATION, CONCLUSION OF CONTRACT	1
§ 2	SUBJECT MATTER	1
§ 3	SERVICES OF OMNINET	2
§ 4	LEGAL CONCESSION TO THE CUSTOMER	2
§ 5	RENUMERATION	3
§ 6	PARTICIPATION OF THE CUSTOMER	3
§ 7	MATERIAL DEFECT AND LEGAL DEFICIENCY	4

§ 1 Scope of application, conclusion of contract

§ 1.1 Scope of application

- § 1.1.1 These "General Terms and Conditions - Software Transfer of Standard Software ("**GTC-ST**") apply to all contracts for the transfer of standard software concluded between OMNINET and their contractual partner.
- § 1.1.2 The area of validity of the GTC-ST is limited to the B2B sector and is only applicable to contracts with consumers to the extent that the GTC-ST can be used to interpret the respective individual contract within the framework of the statutory provisions.
- § 1.1.3 Unless otherwise stated, references in this contract always refer to the GTC-ST.
- § 1.1.4 In addition, the General Terms and Conditions of OMNINET general part ("**GTC-GP**") as well as the respective additionally relevant pertinent GTC shall apply.

§ 2 Subject matter

§ 2.1 Contractual software

- § 2.1.1 "**OMNITRACKER**" consists of the OMNITRACKER platform and the OMNITRACKER applications.
- § 2.1.2 The "**OMNITRACKER Platform**" includes all components listed in the respective current price list of OMNINET under the article groups "**OMNITRACKER License Packages**", "**OMNITRACKER Individual Licensing**", "**OMNITRACKER Interface Bus**" and "**Third-party Licenses**".
- § 2.1.3 The "**OMNITRACKER Applications**" include all components listed in the current price list of OMNINET

under the article group “OMNITRACKER Applications” in the unchanged version provided by OMNINET (“**Standard Applications**”).

§ 2.1.4 The OMNITRACKER components of the OMNITRACKER platform selected by the customer pursuant to § 2.1.2 and the selected OMNITRACKER applications pursuant to § 2.1.3 constitute the “**Contractual Software**”. The contractual software is explicitly listed in the “**Product Certificate**”, which the customer receives together with the license key required for the installation and use of the contractual software (see § 3.1).

§ 2.1.5 The “**Scope of Services**” of the contractual software results from the user documentation and the test version. The customer shall receive the user documentation in electronic, printable form and, for the OMNITRACKER platform, additionally as online help.

§ 2.2 Expansion level and remuneration

§ 2.2.1 The remuneration depends on the type and scope of use of the contractual software chosen by the customer. The remuneration accruing therefor results from the respective current price list of OMNINET, unless otherwise expressly agreed in writing.

§ 2.3 Additional services

§ 2.3.1 Further services for the contractual software, such as installations, adaptations and modifications of the contractual software, maintenance, instruction and training, shall be regulated by the contracting parties in separate, legally independent agreements, if necessary. They are not part of this agreement.

§ 2.3.2 In general, OMNINET is prepared to comply with reasonable additional requests of the customer upon separate order.

§ 2.3.3 OMNINET's support services such as instructions, installation assistance, software adaptations or similar services going beyond the provision of the standard software shall be remunerated separately by the customer. Their remuneration shall be based on the fixed price explicitly agreed for this purpose or on the expenditure of the use of personnel. The latter shall be calculated according to the time spent at the rates listed in the respective valid price list.

§ 2.3.4 Explicit reference is made to § 1.3 and § 1.4 of the GTC-GP.

§ 3 Services of OMNINET

§ 3.1 Implementation of the contractual software, license key

§ 3.1.1 The customer shall receive the contractual software in a form required for the installation on a data carrier or as a download from the internet portal of OMNINET.

§ 3.1.2 Initially, the customer receives a time-limited license key that expires no later than thirty (30) days after the agreed period of payment.

§ 3.1.3 After receipt of the payment, OMNINET shall provide the customer with a license key (e.g. with no duration limit) which guarantees the use of the software within the contractually agreed scope of performance for the contractually agreed duration. This license key is bound to the host ID of the server instance.

§ 3.1.4 The authorization to use the contractual software, in particular the applications, is based exclusively on the agreed use and period of operation. The possible effectiveness of a license key or usability of an application beyond the period of use does not entitle the user to use the software beyond the contractually agreed period of operation. Any use of the contractual software or applications that exceeds the term of the contract constitutes overuse within the meaning of this agreement, see § 4.3.

§ 3.2 Shipping

§ 3.2.1 The shipping or transmission of the contractual software and the associated services shall be at the risk and expense of the customer.

§ 4 Legal concession to the customer

§ 4.1 Determined use

§ 4.1.1 The customer shall only use the contractual software to the extent stipulated in the contract in accordance with § 2.1, which includes installation, loading and running of the program as well as a copy for data backup (see also § 4.4).

§ 4.2 Legal concession

§ 4.2.1 The customer shall exclusively receive the right to use the contractual software for the agreed duration (e.g. unlimited in time) for only one server instance at a time, unless other types of use are specified in the product certificate pursuant to § 2.1.4.

§ 4.3 Overuse

§ 4.3.1 If the customer uses the contractual software beyond the agreed extent of use (“**Overuse**”),

- a) a contractual penalty of € 25,000 shall be agreed for each case of offense without any special proof of damage by OMNINET being required. Several cases of offense shall also be deemed to exist if all offences are covered by a uniform intention of the customer;

- b) the customer shall additionally compensate OMNINET for the correspondingly higher price.
- § 4.3.2 Insofar as the amount of the contractual penalty does not stand up to legal scrutiny, the contractual penalty shall be adjusted or reduced by the court to the extent that it corresponds to the legal situation applicable at the time of the decision.
- § 4.3.3 The customer shall notify OMNINET of any overuse without delay on its own initiative. In case of reporting of one own's offense, OMNINET may, according to the circumstances, refrain from enforcing the contractual penalty according to § 4.3.1. a). However, a claim to this shall not be established thereby. This does not imply OMNINET's consent to the overuse.
- § 4.4 Unallowed duplication**
- § 4.4.1 Duplication of the contractual software beyond the above and the scope stated in the product certificate (see § 4.2) is generally not permitted, except for making a backup copy of the contractual software (see also § 4.1).
- § 4.5 Duplication, user documentation**
- § 4.5.1 The customer may duplicate the user documentation for internal purposes.
- § 4.5.2 Duplication for other purposes is only permitted if OMNINET has given its prior explicit written consent to the duplication and the purpose of distribution pursued thereby.
- § 4.6 Change of the contractual software**
- § 4.6.1 Modifications of any kind to the contractual software are only allowable for the OMNITRACKER applications pursuant to § 2.1.3 and only by means of the mechanisms and procedures provided and documented by OMNINET (for exceptions see § 4.8).
- § 4.6.2 The duplication of the results obtained by the customer is only permitted with the written consent of OMNINET.
- § 4.7 Transmission of the contractual software**
- § 4.7.1 The customer may only sell the contractual software to a third party or pass it on to such third party free of charge with OMNINET's consent, including the user documentation and any other accompanying materials, and only to the extent that the third party expressly undertakes in writing to comply with these contractual terms.
- § 4.7.2 In addition, the customer is obliged to hand over to the third party all material relating to the contractual software that is available to them or to destroy any copies that have not been handed over (e.g. backup copies).
- § 5 Renumeration**
- § 5.1 Amount of remuneration, subrogation**
- § 5.1.1 Upon payment of the remuneration invoiced by OMNINET, the customer shall receive the agreed rights to use the contractual software pursuant to § 4.2.1.
- § 5.2 Renumeration of additional services**
- § 5.2.1 Additional services of OMNINET (installation, adaptations and modifications of the contractual software, maintenance, instruction, trainings etc.) shall be agreed upon separately and shall in any case be remunerated separately by the customer (see also § 2.3).
- § 5.3 Contact persons**
- § 5.3.1 License invoices, product certificates, license keys as well as documents of comparable content may also be sent by OMNINET by email.
- § 5.3.2 The customer shall name an authorized contact person to OMNINET for this purpose.
- § 5.3.3 Explicit reference is made to § 2.1 der GTC-GP.
- § 6 Participation of the customer**
- § 6.1 Software environment**
- § 6.1.1 The customer shall procure additional software required for the use of the contractual software (operating system, database software, etc.) at its own expense in the suitable, released version designated by OMNINET and provide it free of charge in due time before the agreed delivery.
- § 6.2 Trainings**
- § 6.2.1 The customer shall, if necessary, send suitable employees to the trainings offered by OMNINET as an additional service according to § 2.3 in due time.
- § 6.3 Deployment of employees**
- § 6.3.1 The customer is obliged to use only suitable employees when using the contractual software and to record the use of the contractual software and any special incidents that occur in a suitable manner.
- § 6.3.2 Employees are suitable if they possess the necessary knowledge and skills to use the contractual software

within the scope of its contractual possibilities of use in a fully comprehensive and error-free manner without any assistance by OMNINET and if they have comprehensive system administration and OMNITRACKER configuration skills ("**Suitable Employee**"). The suitability of the employees can be achieved by a successful participation in the corresponding trainings of OMNINET.

§ 6.3.3 Recording can only be considered suitable if it is made in a manner that is easily comprehensible for third parties or OMNINET and in a common file format (Word/Excel/PDF or similar).

§ 6.3.4 Costs and expenses incurred by OMNINET due to unsuitability of the customer's employees shall be borne by the customer in full. This shall not apply if the customer proves that these would also have been incurred if suitable employees had been employed. The same shall apply in case of unsuitable recording.

§ 6.4 Provision of staff in case of on-site work

Insofar as OMNINET carries out work directly at the customer's premises, the customer shall provide OMNINET with the corresponding rooms, devices, software, documents with, if applicable, error examples and data material, also test data, processing time as well as employees for information in due time and free of charge and to an appropriate extent.

§ 7 Material defect and legal deficiency

§ 7.1 Material defect

§ 7.1.1 A "**Material Defect**" exists if the contractual software does not have the contractually agreed quality or if it is not suitable for the contractually intended use.

§ 7.1.2 The "**Contractually Agreed Quality**" results exclusively from the user documentation and the test version made available to the customer by OMNINET.

§ 7.1.3 Any use provided for in the contract shall only be permissible if expressly agreed between the contracting parties.

§ 7.1.4 Technical data, specifications and performance information in public statements, in particular in advertising material, are not quality information.

§ 7.2 Legal deficiency

§ 7.2.1 A "**Legal Deficiency**" exists if the customer has not been effectively granted the rights necessary for the contractual use.

§ 7.3 Limitation period

§ 7.3.1 Claims based on material defects and/or legal deficiencies shall become statute-barred within one (1) year after delivery of the contractual software. Delivery shall be understood to mean the transmission of the first license key.

§ 7.4 Modification of programs by the customer

§ 7.4.1 Insofar as the customer modifies the contractual software themselves or has it modified by third parties in accordance with § 4.6.1, § 4.8 the claims due to material defects or legal deficiencies shall be allotted, unless the customer proves that errors which have occurred are not attributable to this fact and that the error analysis and elimination by OMNINET is not impaired thereby. This proof can be provided by the customer reproducing the error in the originally delivered, unchanged version of the contractual software on a reference system.

§ 7.4.2 Insofar as the customer uses the contractual software together with hardware or software of third-party manufacturers which were not expressly described in the document "**OMNITRACKER System Requirements**" - in its respective valid version-dependent form - as compatible with the contractual software and which interfere with the operation of the contractual software, § 7.4.1 shall apply accordingly.

§ 7.5 Duty to examine and duty to object

§ 7.5.1 After delivery of the contractual software to the customer pursuant to § 3, the customer shall immediately inspect it for any defects and immediately notify OMNINET thereof. If the customer breaches this duty, the customer shall no longer be entitled to the rights as set out in the following section with regard to such material defects which would have been recognizable in case of a proper initial inspection.

§ 7.6 Notification of defects by the customer

§ 7.6.1 Explicit reference is made to § 2.4 of the GTC-GP.

§ 7.7 Subsequent performance

§ 7.7.1 OMNINET is entitled to fulfil the subsequent performance by rectification of defects or by new delivery at its choice. The customer may demand a new delivery or rectification of defects within a reasonable period of time if the respective other form of subsequent performance is unreasonable for it.

§ 7.7.2 OMNINET may also remedy the defectiveness by giving instructions to the customer by telephone, in writing or electronically.

§ 7.7.3 Additional expenses incurred by OMNINET due to the fact that programs have been transferred by the customer to a place other than the place of performance specified in the contract shall be borne by the

customer.

- § 7.7.4 If it turns out that a defect reported by the customer does not actually exist or is not attributable to a program according to the product certificate, OMNINET shall be entitled to charge the customer for the expenses incurred in connection with the analysis and other processing in accordance with the then current price list.

§ 7.8 Period of grace

- § 7.8.1 If OMNINET is not successful with the subsequent performance within a reasonable period of time, the customer is entitled to set OMNINET a reasonable final period of grace.
- § 7.8.2 The subsequent performance shall not be deemed to have finally failed already with the second subsequent performance attempt. Rather, OMNINET shall be free to choose the number of subsequent performance attempts during the periods of grace.

§ 7.9 Limitation of claims in case of minor defects

- § 7.9.1 The right of rescission and compensation instead of the entire performance only exists in case of major defects.

§ 7.10 Compensation for use in the event of rescission or non-payment of the remuneration

- § 7.10.1 In the event of a justified rescission on the part of the customer, OMNINET shall be entitled to demand reasonable compensation for use drawn by the customer from the use of the programs in the past until the rescission. This compensation for use shall be determined based on a four-year total period of use of the programs, with an appropriate deduction for the impairment of the programs due to the defect which led to the rescission.
- § 7.10.2 The same shall apply if the customer, contrary to the contractual agreement, does not pay the remuneration and uses the software provided by OMNINET during the period according to § 3.1.

§ 7.11 Measures in case of alleged legal deficiencies

- § 7.11.1 If a third party asserts the breach of a remedial statute against the customer due to the use of the contractual software, the customer shall inform OMNINET thereof without delay and leave the defense against such claims to OMNINET as far as possible. In doing so, the customer shall provide OMNINET with all reasonable assistance. In particular, the customer shall provide OMNINET with all necessary information about the use and possible processing of the programs, if possible in writing, and shall provide OMNINET with the necessary documents.
- § 7.11.2 If the customer fails to inform OMNINET without delay about an alleged legal deficiency, the customer shall have to bear all expenses and costs resulting therefrom which could have been avoided by an immediate notification.
- § 7.11.3 Explicit reference is made to § 5.2 of the GTC-GP.
- § 7.11.4 To the extent that third party rights are violated, OMNINET may, at its own discretion, remedy the violation by
- a) obtaining from the person entitled to dispose of the remedial statute a right of use for the benefit of the customer which is sufficient for the purposes of this contract, or
 - b) modifying the defective software without affecting its function or only with effects acceptable to the customer, or
 - c) replacing the defective software without effects or only with effects acceptable to the customer on its function with software whose use in accordance with the contract does not violate any breach of remedial statute, or
 - d) delivering a new program version, the use of which in accordance with the contract does not violate any third-party property rights.

In all other respects, the provisions of § 7 for material defects shall apply accordingly in the case of legal deficiencies.
