

# Digitalization made simple

Individual software development  
for your transformation process

# Consulting and implementation under one roof

We have successfully supported numerous transformation processes. You will benefit from our many years of experience in the field of software development.

## Your benefits

We combine individuality with a maximum of efficiency. Every project is unique to us—we live this principle starting from the requirements analysis, the conception, the implementation, the go-live up to systematic tests, continuous development, and maintenance of your software solution.

- Implementation of development services according to SCRUM in combination with classical PMI standards
- System, interface and end user documentation
- Training for the administration and use of the system solution
- Proven procedure for planning and implementation
- Streamlined communication throughout the entire project with the same contact person

## Technologies

The development team of OMNINET Austria brings comprehensive expertise to implement your digitalization project quickly and efficiently. To do this, we use Microsoft.Net technologies and other leading development tools. Of course, we also handle the topics of database systems and interface connection.

### Web and desktop developments

- ASP (C#, Razor)
- PHP (CakePHP)
- Angular
- C# (WPF, Windows Forms)

# Reference web projects

## Province of Carinthia

### Project description

The Family Department of the Province of Carinthia, together with OMNINET Austria, has created an information hub for parents, legal guardians, grandparents, but also for children and young people. The clearly structured parent education platform "Lebenswelt Familie" lists educational offers and provides an overview of established educational institutions.

### Solution and specifics

The web application was developed based on PHP with the CakePHP framework.

- Intuitive design (UI) for easy location of listed content
- Effortless administration and maintenance of all content for the educational institutions in Carinthia
- Centralized, digital bundling of information in a web-based application

## Province of Vorarlberg

### Project description

In Vorarlberg, all energy certificates must be created via the state platform for energy certificates. Via a web-based application, legally valid energy certificates are generated in a PDF file automatically. In addition, the website offers comprehensive information on related topics (e.g. statistics, legal circumstances).

### Solution and specifics

A comprehensive CMS system was created for the administration of all articles and database entries with intuitive assistant features.

- Extensive rights and roles concept
- Interface implementation of internal and external services
- Connection of a newsletter and survey module
- Monitoring tool for the evaluation of energy policy objectives

## Independent solutions

For companies of the SME sector to global players: We support all enterprises in the digitization and automation of IT and non-IT services. OMNITRACKER is used in all industries and company sizes. Thanks to our experience and flexibility, we serve all branches as well as niche sectors with individual solutions.

### We will gladly assist you

If you are also facing a digitalization project or a similar challenge, we will be happy to advise you. As part of our individual customer projects, we offer you solutions for your individual requirements. At the same time, we support you in identifying the potential of existing systems. Therefore, best-of-breed solutions or our own software products are used in combination in order to achieve the highest quality standards.
